

BSO MECHANICAL

Capability Statement 2026

BSO Mechanical – Capability Statement

Company Overview

BSO Mechanical is a Western Australian-owned and operated mechanical services provider delivering highly skilled trades and workforce solutions across the mining, civil, transport and industrial sectors.

Operating from our fully equipped Mandurah workshop facility, we provide structured operational oversight, mobilisation coordination, and workshop support to projects across Western Australia and the Northern Territory.

Our workforce is actively deployed across regional, remote, FIFO and DIDO environments, supporting clients with disciplined workforce management and site-compliant trade delivery.

Our commitment is clear:

Reliable Trades. Safe Execution. Quality Outcomes.

Operational Footprint

- Mandurah-based workshop and operational headquarters
- Mobilisation capability across Western Australia
- Active deployment throughout regional and remote WA
- Expanded operations into the Northern Territory
- FIFO and DIDO workforce availability
- Growing company fleet supporting rapid response and mobilisation

This structure enables BSO Mechanical to maintain strong local governance while delivering scalable workforce solutions across multiple jurisdictions.

Core Service Capability

Heavy Diesel Fitters

- Heavy mobile plant maintenance
- Breakdown diagnostics and fault rectification
- Major component change-outs and rebuilds
- Preventative and scheduled maintenance programs
- Field service and shutdown support

Boilermakers

- Structural fabrication and coded welding
- Tray and bucket rebuilds

- Plant repairs and reinforcement
- Shutdown and project-based works
- Workshop and site-based fabrication

Auto Electricians

- Electrical diagnostics and system fault finding
 - Harness repair and replacement
 - Lighting system installation and upgrades
 - Charging and battery systems
 - Mobile plant electrical maintenance
-

Leadership & Governance

BSO Mechanical is led by an experienced executive team combining hands-on trade knowledge with structured operational governance.

Trent Pollard – Director

Trent provides executive oversight across strategy, client engagement, workforce capability and operational performance.

With extensive experience in heavy diesel maintenance and mining operations, Trent ensures disciplined execution, strong compliance standards and long-term client partnerships.

His focus areas include:

- Strategic contract development
 - Operational risk management
 - Workforce standards and capability oversight
 - Compliance governance across WA and NT
 - Sustainable business growth
-

Chloe Pollard – Operations & Workforce Coordination

Chloe leads workforce mobilisation and operational coordination across all active projects.

She oversees compliance documentation, scheduling, onboarding and client reporting to ensure trades are site-ready and deployment compliant.

Her structured systems ensure:

- Workforce readiness and compliance integrity
- Efficient mobilisation processes

- Clear communication between site teams and clients
 - Documentation governance and reporting accuracy
-

Safety & Compliance

Safety is non-negotiable at BSO Mechanical.

All personnel:

- Hold current Australian Drivers Licences
- Maintain up-to-date site medicals
- Pass Drug & Alcohol screening
- Hold National Police Clearances where required
- Are fully inducted and site compliant

We operate under a Zero Harm commitment and align strictly with client safety management systems and site protocols.

Why Partner With BSO Mechanical

- ✓ Mandurah-based operational foundation
- ✓ WA presence with NT expansion capability
- ✓ Reliable FIFO and DIDO workforce
- ✓ Structured mobilisation systems
- ✓ Growing fleet and scalable workforce
- ✓ Proven long-term contract capability
- ✓ Community-focused, values-driven organisation

BSO Mechanical builds long-term partnerships founded on accountability, reliability and consistent performance.
